Every minute, a child dies from a mosquito bite. An estimated 1 million people a year die from malaria. In 2015, 89% of all malaria cases and 91% of deaths were in sub-Sahara Africa. Malaria is preventable AND treatable.

In 2012, ONE HUNDRED CHILDREN DIED (in only one month!) from malaria and anemia. The provincial government has authorized and urged our Partner in the Congo to build clinics so that doctors from overseas can come and treat the needy. Our Partner in the Congo has already built 600 schools. Additional help is necessary! With a contribution of \$5,250, the picture below shows our partially completed clinic that we and our benefactors have helped facilitate.
